

I ask that the FCC should not consider the implementation of any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved my quality time at home. Before the law, I previously received up to ten calls per week. I have received less than five total calls since the passage of the law. It has greatly improved my time with my family, as we can eat dinner uninterrupted and are able to discuss our daily concerns.

Thank your for your consideration of this matter.
